Major changes by subject in US in 2024

ROLL OVER subjects to see new requirement numbers

What's changing in EHS Regulatory Requirements in the US?

As in many parts of the world, the US is prioritizing air emissions, hazardous materials management, and occupational health and safety: topics where the highest numbers of new and changing regulations can be found, according to Enhesa's expert-created regulatory content. However, as opposed to the federal government introducing most of these changes, the vast majority are happening at the state level.

Where are these changes happening - and how are they impacting businesses? Watch as Regulatory Expert for the US, Jordan Stone of Enhesa, provides her analysis of the top regulatory trends across the US - and which states are introducing them - for 2024; and what these trends could mean for companies in 2025.
