

10 smart ways to automate EHS compliance across global operations

Executive summary

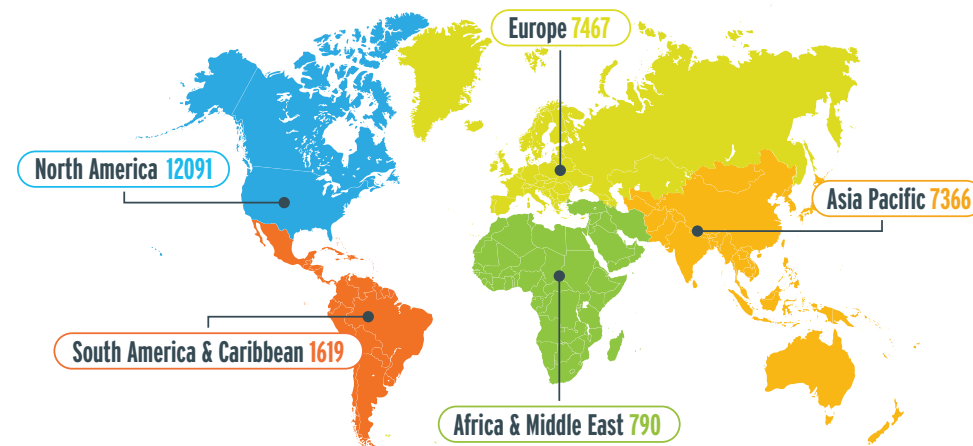

Managing environmental, health, and safety (EHS) compliance is tough enough — and when your operations span multiple countries, time zones, and regulatory frameworks, it only gets more complicated. From keeping up with ever-changing local laws to preparing for audits and ensuring your teams are trained and aligned, it's a lot to stay on top of.

That's exactly why **EHS Insight and Enhesa have teamed up** — to help organizations like yours cut through the complexity.

We're breaking down the **10 smart, practical ways to automate EHS compliance tracking** across global operations. With real-world examples and actionable tips, you'll see how automation can help you reduce administrative burden, improve consistency, and stay ahead of regulatory change — without the usual stress.

Regulatory changes around the world in 2024

1. Tackling the toughest global EHS compliance challenges

If you're responsible for EHS across multiple locations, you already know the pain points:

- **Too many rules:** Regulations vary by country, state, and even city.
- **Too much manual work:** Paper files and spreadsheets are still surprisingly common.
- **Too little visibility:** It's tough to know where you stand before an audit hits.

That's where automation comes in. With the right tools, you can streamline compliance, gain real-time visibility, and spend more time on what matters — keeping people safe.

2. How EHS Insight and Enhesa work together

Together, EHS Insight and Enhesa make a powerful team for EHS professionals.

- **EHS Insight** gives you the tools to manage incidents, audits, training, and compliance in one centralized system. It's built for flexibility and ease of use, so your teams can actually enjoy using it.
- **Enhesa** brings up-to-date, location-specific regulatory knowledge straight to your fingertips, so you're never caught off guard by a new law or change in requirements.

When you connect the two, you get a smart, automated compliance solution that grows with your global operations.

New regulations or updates?

Of the thousands of regulatory changes we saw in 2024, many were major updates to existing regulation, but there were also a lot of new regulation introductions.

3. Real-time regulatory updates, without the hassle

The challenge

Regulatory changes are constant and can differ drastically from one location to another.

The fix

Enhesa's updates flow directly into EHS Insight, so your compliance tasks, forms, and alerts are always current.

Real-world win

A global manufacturer uses this setup to stay in sync with laws in Europe, Asia, and North America — no manual checks required.

4. Streamlining incident reporting from the ground up

	The challenge	Manually reporting incidents can be slow, inconsistent, and prone to errors.
	The fix	EHS Insight makes it easy for workers to log incidents using structured, easy-to-fill forms. The system does the rest — routing reports, triggering alerts, and even customizing them based on local laws. The integration with Enhesa ensures that incident reports are aligned with regional regulatory requirements.
	Real-world win	A major retail chain now captures and responds to incidents faster across all locations thanks to automated reporting and built-in corrective actions.

5. Smarter checklists, smarter workflows

	The challenge	Paper checklists and static templates don't adapt well to different sites or changing regulations.
	The fix	With EHS Insight, checklists update dynamically based on risk levels, geography, and regulations. No more guesswork or missed steps.
	Real-world win	A logistics company now relies on automated checklists that adjust for each warehouse location — keeping safety inspections on track everywhere.

6. Compliance audits without the panic

	The challenge	Pulling together documents for audits is time-consuming and often last-minute.
	The fix	EHS Insight keeps everything organized and audit-ready, 24/7. Reports are generated automatically, with no need to dig through old files or email threads.
	Real-world win	A pharmaceutical company saves weeks of prep time before each audit by having all required documents, checklists, and training logs instantly available.

The hot topics of 2024

Which topics added the most new regulatory requirements in 2024?

7. Risk assessments that practically run themselves

	The challenge	Risk assessments often lag behind real-time hazards and take too long to complete.
	The fix	EHS Insight automates the process by pulling in live data, generating assessments, and assigning action plans instantly.
	Real-world win	A construction firm uses automated risk assessments for every new job site, ensuring fast, consistent evaluations tied to regional safety standards.

8. Keeping training and certifications on track

	The challenge	Manually tracking training and certifications leads to gaps, lapses, and potential compliance issues.
	The fix	EHS Insight monitors training progress, sends out renewal reminders, and stores records in one place for easy reporting.
	Real-world win	A manufacturing company uses automation to keep every employee up to date on required training — no spreadsheets needed.

9. Using data to drive improvement

The challenge

Without real-time data, it's hard to know what's working — or what's not.

The fix

EHS Insight delivers real-time dashboards that pull together data from across your operations. It's a bird's-eye view of your entire EHS performance.

Real-world win

A retail brand uses these insights to spot trends, fine-tune training, and lower incident rates across hundreds of stores.

10. Connecting the dots with open APIs

The challenge

Disconnected systems create data silos and duplicate work.

The fix

EHS Insight's open API lets you connect with your ERP, HR, and other enterprise systems, including Enhesa's regulatory platform — so data flows seamlessly and stays accurate.

Real-world win

An energy company integrates EHS Insight with its ERP to keep safety data synced across departments, improving reporting and reducing duplication.

The bottom line: It's time to automate EHS compliance

EHS compliance doesn't have to be overwhelming. With automation and the right tools, you can simplify your processes, improve safety, and stay ahead of ever-changing regulations no matter where your teams are.

EHS Insight and Enhesa make it easy to build a system that works for your business, today and in the future.
