

Prepare your business for regulatory change

ehs intelligence

To protect your business from unexpected disruptions, you need to understand not just the regulations in force now but also the regulatory trends you need to plan for in the future. In this infographic, we explain how.

Know what you don't know

With EHS regulations in what seems like a constant state of flux, it can be easy to fall into a reactive stance toward regulatory developments. However, last-minute changes can result in operational liabilities, legal impacts, and missed deadlines. To avoid these risks, expand your horizon of strategic visibility and front-load long-term planning with a knowledge of what regulatory changes are coming next.

The right information at the right time

As businesses expand their horizon of strategic planning, teams are empowered with better data to make informed, proactive choices in their areas of need. Whether it's urgent corrective actions, resourcing and budgeting, or strategic, long-term investments, looking at in-force, near-term, and long-term regulatory changes can help your business make better, more future-proof decisions.

Empowering teams with forward-looking EHS requirements

EHS regulations impact roles across your organization who need to understand and plan for compliance. Communicating EHS information to these stakeholders is essential — whether it's centralized from one role or delivered on a self-serve basis. Clear, plain-language requirements accessible to even non-EHS experts, delivered in intuitive, easy-to-search and filter technology, lets anyone access the EHS regulatory data they need.

Understand the needs of your stakeholders

Multiple stakeholders need updates on emerging EHS regulations — but they each have different requirements. In this infographic, we explore what each of them needs.

Corporate EHS teams

Site-level teams

Functional teams

About the role

Corporate EHS teams need insights to inform short-term, near-term, and long-term compliance strategies

Site-level teams are responsible for keeping one or more facilities compliant based on regional priorities

Functional teams need to understand the upcoming regulatory changes that impact their function, like HR, finance, legal, operations, and more

EHS needs

A global view of EHS requirements affecting the organization

A tailored view of regulations relevant to their specific site

Updates and alerts on relevant regulations and a summary of impacts

Today's challenges

Fragmented EHS information in multiple formats — they want a standardized view of EHS regulations across all jurisdictions

Alignment with corporate teams and global EHS strategy — they want an easy way to align global strategy and site-level impacts

May not have specific experience in EHS — they want actionable plain-language information about what's required

Regulatory Forecaster provides

- Standardized format for all global EHS requirements
- Global forward-looking coverage of emerging legislation and EHS trends

- Filter by topics and jurisdictions
- Save and share tailored views

- Plain-language summaries
- Updates and alerts when relevant regulations change

For more information, watch the webinar, [Prepare your EHS strategy for what's ahead](#), where we discuss the challenges global organizations face with emerging regulations, share proven strategies for meeting them, and demonstrate how Regulatory Forecaster can make this process easier.
